MINERALS USED IN A REFRIGERATOR

1/10/2011LV

COPPER:	Electrical cord wire, compressor, condenser coils, fan motor, light bulb base
PETROLEUM:	Plastic interior and exterior parts
QUARTZ, CALCITE:	Glass shelving, light bulb globe
IRON ORE:	Steel frame, body, doors, and door handles
TUNGSTEN:	Light bulb filament
TITANIUM DIOXIDE:	Colorant in enamel paints
FLUORITE:	CFC refrigerants (Freon)
BARITE:	Additive in rubber or plastic door seals
SULFUR:	Additive in rubber or plastic door seals
ALUMINUM:	Various body, interior, motor, and compressor parts, wire racks and shelves
CHROMIUM:	Chrome plating on steel door handles, trim
COLEMANITE:	Fiberglass insulation (also contains quartz and calcite)
MERCURY(?):	Thermostat controls

This is probably an incomplete list. There may be other mineral components in the enamel paint and in the various parts and pieces of a refrigerator.
